BU School of Medicine

Clinical Research Assistant

DIAGNOSE CTE Research Project

Boston University Alzheimer's Disease and CTE Centers

Full-Time Position

Responsibilities: We are seeking a talented individual to serve as the Boston University (BU) Site Coordinator, and as a member of the national Coordinating Center, for the **DIAGNOSE CTE Research Project**, a 7-year, multi-site, multidisciplinary study, funded by the National Institutes of Health. The primary goals of the study are to develop methods of diagnosing chronic traumatic encephalopathy (CTE) during life and to examine risk factors for this neurodegenerative disease. Responsibilities include coordinating participant visits, administering and scoring neuropsychological tests, managing data collected during study visits, as well as other related duties. There is potential for serving as an author on journal publications.

Qualifications: Minimum of a bachelor's degree, preferably with one or more years of experience in a research setting. Preference will be given to applicants with direct experience administering neuropsychological tests.

Superb experience for individuals planning to apply to medical school or graduate school in neuropsychology, public health, or neuroscience.

2-year minimum commitment

To apply, please e-mail a cover letter and resume to:
Nicole Gullotti, Assistant to Dr. Robert Stern
ngullott@bu.edu

References will be requested and an in-person interview will be scheduled for top applicants only
